Derailed Action

Drawings Objection

The drawings are objected to because:

In Fig.1, reference numeral "42" has not been described in the specification.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Objection to the Specification

The disclosure is objected to because of the following informalities:

(1) On page 5 (at line 4) and page 7 (at line 12), "39" should read --20--. "39" is a trimmed portion (see Fig.4 and line 30 on page 7 of the specification).

(2) On page 5 (at line 12) and page 6 (at lines 4 and 10), reference numeral "55" is not found in any drawings.

(3) On page 5, line 30, "cutting blades" should read --blade arms--.

(4) On page 5, line 11, "a pair" should read --a pair of--.

(5) On page 7, line 14, "64" is not found in any drawings.

(6) On page 8, line 26, "89" is not found in any drawings.

(7) On page 8, line 28, "41" should read --14--.

(8) On page 9, line 7, after "(11,13)", --,-- should be added.

(9) On page 9, lines 23-24 do not agree with Figs.6-7. It is suggested "of the second gripping arm (13)" be changed to --of the first gripping arm (11)--.

Appropriate correction is required.

Claims Objection

Claims 7-9 are objected to because of the following informalities:

(1) In claim 7, line 3, "first and second blade arms" should read --the first and second blade arms--.

(2) In claim 8, line 3, "connection member" and "pair of blade arms" should read

--the connection member-- and --the pair of blade arms--, respectively.

Appropriate correction is required.

Claims Rejection - 35 U.S.C. 102(b)

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 10-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Lobl (U.S. Patent No. 1,499,673).

Since Lobl's trimming device (Figs.4-5) shows all the claimed structure, it is held Lobl's device is fully capable of being used to trim a candlewick at a predetermined height above a fuel portion of a candle as claimed.

Indication of Allowable Subject Matter

1. Claims 2-6 and 13-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

2. Claims 7-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims and to overcome the objections as set forth.

3. Claims 16 and 17 are allowed.

Prior Art Citations

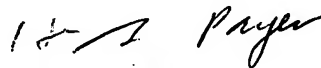

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Wilcox, Schnefel, Keating, Shah, Pine and French Patent 2 603 467 are cited as art of interest.
